

**Solve the following exercises. Follow the pattern and observe if the commutative property applies to division as well**

$$4 \times 7 = 28 \text{ therefore } 28 \div 4 = 7$$

$$28 \div 7 = 4$$

$$5 \times 6 = 30 \text{ therefore } 30 \div 5 = \underline{\hspace{2cm}}$$

$$30 \div \underline{\hspace{2cm}} = 5$$

$$7 \times 8 = 56 \text{ therefore } 56 \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$56 \div 7 = \underline{\hspace{2cm}}$$

$$9 \times 3 = 27 \text{ therefore } 27 \div 3 = \underline{\hspace{2cm}}$$

$$30 \div \underline{\hspace{2cm}} = 9$$

$$5 \times 4 = 30 \text{ therefore } 20 \div 5 = \underline{\hspace{2cm}}$$

$$20 \div \underline{\hspace{2cm}} = 5$$

$$9 \times 11 = 99 \text{ therefore } 99 \div 9 = \underline{\hspace{2cm}}$$

$$28 \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$5 \times 12 = 60 \text{ therefore } 60 \div 5 = \underline{\hspace{2cm}}$$

$$\underline{\hspace{2cm}} \div 12 = 5$$

$$4 \times 9 = 36 \text{ therefore } 36 \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$36 \div 9 = \underline{\hspace{2cm}}$$

$$10 \times 6 = 60 \text{ therefore } 60 \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$60 \div \underline{\hspace{2cm}} = 10$$

$$7 \times 6 = 42 \text{ therefore } 42 \div 6 = \underline{\hspace{2cm}}$$

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = 6$$
